

Helpful Articles on establishing a Mentor-Mentee Relationship with Students

How faculty-student mentoring relationships affect college students' development and academic success - Evidence-Based Mentoring

Supportive mentoring relationships have an influential effect on college students' academic success and overall development. This study drew data from the Gallup-Purdue Index in order to identify various factors that correlate with positive mentoring relationships among college students. Findings indicate that first-generation college students and college students attending bigger ...

Six ways for professors to engage with their students

A professor provides six ways instructors can build relationships with their students to promote engagement and persistence. Professors are key to a student's academic success and retention through their teaching, course content and assessment strategies, but students say interpersonal relationships also play a role in their learning.
